TECHNICAL SKILLS

Core: Full-Stack Engineering, Distributed Systems, Microservices, Event-Driven Architecture, REST APIs, Micro Frontend, Batch Processing, Responsive UI, Performance Monitoring, Agile
Programming Languages: Java (8-21), JavaScript, TypeScript, SQL
Frameworks: Spring Boot/MVC/Batch/Security, Hibernate, Node.js, NestJS, Kafka, React, React Native, Nuxt3, Vue.js
Cloud & Databases: AWS (MediaConnect, MediaLive, MediaPackage, CloudFront, Redis, CDK), Azure (AKS, ACR, Cosmos), PostgreSQL, MongoDB, MySQL, Oracle
DevOps: Docker, Jenkins, OpenShift, Kubernetes, HashiCorp Vault, CI/CD, GitHub Actions, SAP Piper, Helm
Additional: Git, Fortify, NexusIQ, Splunk, Datadog, SonarQube, Maven, WebRTC, Socket.IO, JUnit, Kaniko

PROFESSIONAL EXPERIENCE

Software Engineer Intern, SAP, Newtown Square, PA — May 2026 - Present
- Architecting an enterprise live streaming platform using **AWS** with **Akamai CDN** and **WebRTC eCDN offloading**, featuring real-time **7-language AI captioning** and ephemeral event-based pipeline teardowns
- Leading migration of a monolith to **NestJS** and **Nuxt 3** monorepo deployed across **3-region** Kubernetes **clusters**, utilizing automation for feature branch environments and horizontal scaling
- Engineering high-scale event & collaboration infrastructure using **Socket.IO** and **Redis Pub/Sub** across **10 namespaces**, powering low-latency moderated Q&A, live polls, slide synchronization, and viewer analytics for **9k+ concurrent attendees**
- Hardening enterprise security and access control by implementing **multi-provider authentication** (SAML2, OIDC, MSAL, JWT), global XSS/CSRF mitigations, **PII encryption**, ClamAV file scanning, and an **OWASP-aligned** audit logging system with optimistic locking and field-level reverts
- Automating CI/CD pipelines using **GitHub Actions** and **SAP Piper** with **HashiCorp Vault** secret injection, Kaniko containerization, and **automated TLS/DNS** provisioning to streamline **multi-environment** rollouts

Teaching Assistant, Northeastern University, Boston, MA — Jan 2026 - Apr 2026
- **Improved database design accuracy by 25%** across 15+ student systems by reviewing normalized schemas, SQL queries, and distributed data models
- Mentored 25+ students in **database architecture,** including indexing strategies, schema normalization, and distributed storage

Senior Software Engineer (Product Owner), Outright Solutions, India — Apr 2024 - Dec 2024
- Architected and evolved **HIPAA-compliant** backend services of Healthcare Data Platform supporting **1,000+ healthcare providers** by developing secure Java Spring Boot APIs with RBAC authorization and real-time updates via Kafka and Spring Events
- **Reduced production incidents by 30%** by utilizing log monitoring, live debugging, alerting, synthetic monitoring, Error Monitoring, and Anomaly Monitors
- Enhanced system scalability and resiliency through microservices, asynchronous processing, **multithreading**, and **caching**, supporting reliable high performance under **high TPS**

Technical Analyst, Square Infosoft, India — Jul 2019 - Mar 2024
- Developed **Android, iOS,** and **React Native** applications used by **10M+ users,** e.g., KukuFM, SpeakeasyGo, Noticeboard (EdTech App)
- Scaled backend infrastructure by designing **Node.js** and **Spring Boot** services following microservice architecture and **concurrent processing**
- Enabled secure financial and health data processing by integrating **PLAID SDK** & **Apple HealthKit** into backend pipelines
- **Increased** mobile application **stability by 25%** by deploying crash monitoring, analytics instrumentation, and notification systems

EDUCATION

M.S. Computer Software Engineering, Northeastern University (Jan 2025 - *Expected Apr 2027*) — ***GPA 3.95***
Bachelor of Computer Science, GLS University (Jul 2016 - *Mar 2019*) — ***GPA 3.88***
Gold Medalist of the Batch | ***National Hackathon Winner***
